

INTELLIGENT SECURITY OPERATIONS CENTER

Binary Defense is the leading Attack Intelligence company in the world. Along with our sister company TrustedSec, our teams have created PTES, (the Penetration Testing Execution Standard that has become the global model for penetration testing), SET (the Social Engineering Toolkit, the model for engineering the most effective hacks), and run the 2nd largest security conference in the world with DerbyCon. We marry this attack intelligence up with our extensive threat intelligence service to deliver an Intelligent SOC to reduce your burden and better protect your organization.

BINARY DEFENSE: MSSP

At Binary Defense, our goal is to be a true extension of your team to give you a better Return on your Effort. As such, we work with you to create the best managed services experience possible.

BINARY DEFENSE: VISION ENDPOINT SECURITY PLATFORM

Binary Vision is a simple, yet truly advanced real-time attack visibility agent that delivers an endpoint detection and response (EDR) framework aligned to Gartner's Adaptive Security Architecture that can predict, prevent, detect and respond to incidents. Deployed in minutes, Binary Vision is on guard throughout the entire life cycle and evolving phases of an attack. Endpoints are monitored 24/7/365 through our Intelligent Security Operations Center.
